

A photograph of three children running on a green lawn. In the foreground, a young boy with short brown hair, wearing a red zip-up hoodie and grey cargo pants, is running towards the camera with a wide smile. Behind him to the right, a girl with curly hair, wearing a purple and white striped shirt and blue pants, is also running. Further back and to the left, another child is partially visible, running away. The background is a soft-focus green lawn and trees. The right side of the image is decorated with a pattern of yellow circles of varying sizes. The text 'INFILL GROWN BY MOTHER NATURE.' is overlaid in large white letters on the left side, with a thin yellow line underneath. Below this, the tagline 'Peace of mind for everyone.' is written in smaller white letters. The 'safeshell' logo is in the bottom left corner.

INFILL GROWN BY MOTHER NATURE.

Peace of mind for everyone.

safeshell

A NATURAL PRODUCT. That's Also Low Maintenance.

Why Safeshell®?

Safeshell is a naturally occurring product from the farms of America! It has a rich earth tone color and is allergen free. **Safeshell** is used with a **Round Raw Sand Ballast Layer** and has evaporative cooling properties, keeping your playground cooler. It also has an 8-year warranty when used with a recommended infill system.

Safeshell is the low maintenance organic infill option made of 100% USA-grown walnut shells. **Safeshell** is a patent-pending infill crafted from a blend of well-rounded Black walnut shells and English walnut shells.

Benefits

● **Cooler temperatures.** Safeshell absorbs water with minimal expansion and releases it slowly over time to keep surfaces cooler. No water? That's okay. A Safeshell system is still cooler than traditional infill.

● **Organic.** With Safeshell you get peace of mind that your infill is made from wild-grown and food-grade components. One less thing Moms need to worry about.

● **Low maintenance.** Safeshell offers all the benefits of an organic infill without the added maintenance. It doesn't float and stays in place even on active areas.

● **Safe.** We use a chemical-free process that eliminates residual allergens which remain on the shell after separation of shell from nut. This patent-pending process reduces allergens by 99.9% which is below the FDA limits for allergen-free foods. We partner with an ISO-certified, third-party lab to constantly verify the results.

Safeshell is 100% natural and domestically-sourced walnut shells.
